✓ **Affordable Water**

My number one goal is to ensure we keep rates as low as possible while providing affordable, safe, and clean water to all Vallecitos customers.

✓ **Clean Water**

Securing sustainable and new water sources will ensure we have a consistent, secure, clean water supply.

✓ **Reliable Water**

Balancing the need for costly infrastructure improvements while keeping rates low will be a challenge, but I'm committed to keeping the cost of water affordable while maintaining a stable water supply.
